

## **School 59**

- To organize such trainings often and when possible to provide with all the necessary material for the organization of the further works.
- The workshop with the psychologist was pleasant and necessary.
- As didactic material everything was useful and educative in working with children with special educational needs. The work and collaboration was pleasant and the feelings were easy and positive.
- The introduction to and the preparation of the educational games supports the work of the general class teachers and special education teachers. For the integration program such didactic games are a need. It is desirable to have such trainings organized more often.
- To have such material at the beginning of the school year would be more efficient and useful. The didactic material could be introduced according to the classes on different days.

## **School 160**

- I find that in the present alongside with the fast changes happening in the field of education the on going training of the specialists of the field is a necessary condition. It's important for the specialists of the field to get acquainted with integration programs. Within this context during this series of trainings the material introduced to us will help us in the implementation of our daily work: for organizing it more efficiently, more interesting and with enriched contents.
- The training was very interesting and up-to-date. It is desirable that such trainings are organized regularly, paying special attention to the use of the presented and prepared games and material.
- I highly estimate both the preparedness of the trainers and the teaching style. We were provided with high quality and valuable teaching material that is very up-to-date and useful in working with the children with special needs. I'd like to have such trainings continuously. Thank you to DAA.
